

Mia-Platform launches a new partnership with Cogniflare to grow the business in the UK

June 9, 2022 - Mia-Platform welcomes Cogniflare, international cloud-focused consultancy providing data-driven solutions to large-scale data movement projects, in its Partner Program. This new partnership will strengthen Mia-Platform's business expansion in the UK thanks to Cogniflare's strong expertise in the market.

Together, the two tech companies aim at accelerating the Digital transformation of enterprises, and reducing the delivery time of innovative digital services thanks to the unique match between Mia-Platform's state-of-the-art technology, and Cogniflare's expertise in Cloud and Data Services.

"Mia-Platform offers a one-stop platform experience for engineering and business communities. It's technology that works at the pace of business, and enables businesses to accelerate! We are delighted to be the partner of choice to bring the benefits of the Mia-Platform to customers in the UK" comments Sivakumaran Mounidevy, CEO at Cogniflare

Cogniflare supports enterprises to move, store, and process data in a rapid and reliable way, thanks to its deep knowledge in some of the most powerful technology infrastructures on the market, such as Google Cloud Platform, MongoDB, NiFi, Kafka, CDAP, and Mia-Platform among others.

Mia-Platform leverages [Fast Data technologies](#) to create event-driven architectures that:

- collect data from any existing system and organize it according to any business need in Business Single Views;
- keep updated in real-time in a high-performance database;
- make data immediately available 24/7 to all the services, channels, and applications of the enterprise.

Such a solution ([Mia-Platform Fast Data](#)) is a set of ready-to-use microservices, and meets the needs of scalability and performance, while ensuring the speed and integrity of information, to embrace the paradigm of omnichannel services and offer users valuable experiences.

“Thanks to this new partnership, Mia-Platform’s excellence in Fast Data technologies is amplified by Cogniflare’s expertise in Data solutions. With this unique mix of competencies, we are ready to accelerate the Digital transformation of enterprises in the UK and at an international level” comments Francesco Caracuta, Director of Channel Partnerships UK.

About Cogniflare

Cogniflare helps enterprises to move, store and process data rapidly and reliably. Founded by Siva Mounidevy and Ahamed Khan in 2019, Cogniflare works with industry leaders such as Vodafone, Lloyds Bank and GSK. As a certified Google Cloud and MongoDB partner, Cogniflare has deep knowledge in some of the most powerful technology infrastructures for data integration, data migration and cloud acceleration.

About Mia-Platform

Mia-Platform is the simplest tool to develop modern cloud native applications on Kubernetes.

The platform helps companies to industrialize and simplify software lifecycle by using APIs, microservices and real-time data, building event-driven architectures, and carrying out DevOps operations.

Its technological excellence is recognized worldwide by institutions such as the Cloud Native Computing Foundation and Gartner, which has recently named Mia-Platform Cool Vendor in its 2021 report "Cool Vendors for Software Engineering Technologies".
