

Bowman joins Mia-Platform Partner Program and adds its Data Management and Content Services Hubs within Mia-Platform Marketplace

3 October 2024 - Bowman, software company specializing in Big Data technologies and complex IT architectures, has officially joined Mia-Platform Partner Network. The company has added its Data Management and Content Services Hubs within Mia-Platform Marketplace.

"The rise of digital transformation initiatives is amplifying the complexity of data interoperability, as vast amounts of diverse data are generated and siloed within different applications and verticals" comments Carlo Sperduti, COO and Co-Founder at BOWMAN. Mia Platform and Bowman have partnered to tackle this challenge, streamlining data access and connectivity across platforms and applications, all without requiring changes to existing systems and applications".

The **Data Management Hub** is a high-performance platform designed to collect large volumes of structured and unstructured data in real time from any source and in any format. It integrates seamlessly with Mia-Platform applications as well as external environments, acting both as a gateway to the platform and as a source of unstructured data for Mia-Platform Fast-Data.

The **Content Services Hub** is a comprehensive content management solution for handling documents, emails, media, and digital content. It breaks down silos within the company by serving as a central hub for the organization's document assets, while also enabling security access rules and governance policies for digital content.

"We are excited to welcome Bowman to our Partner Network" comments **Tommaso Giovannini**, Insurance Area Manager at Mia-Platform. "Their expertise aligns perfectly with the needs of our marketplace and clients. By integrating Bowman's Data Management and Content Services Hubs into Mia-Platform, we offer our users advanced tools that enhance data handling, governance, and real-time content management across various industries".

ABOUT BOWMAN

BOWMAN is a Software Company born from the consolidation of a long research and development experience on Big Data technologies and complex IT architectures.

BOWMAN provides tools for the exploitation of digital documents and content and moving data within IT systems through the development of enterprise class platforms.

BOWMAN is on the market with two Digital Transformation accelerator solutions:

- EXPANDA® Enterprise Content Platform
- ALGORILLA® Knowledge Discovery Platform

BOWMAN has multidisciplinary expertise in the fields of technology, statistics and psychology.
