

Top-class HealthTech startup IntelliProve joins Mia-Platform Partner Network

Milan, 30 May 2024 - IntelliProve, a HealthTech startup known for its powerful AI-based facial scanning technology for digital health solutions, has officially joined the Mia-Platform Partner Network.

As healthcare demands grow and change, technology plays an essential role in providing efficient, accurate, and accessible services. Digital health solutions not only streamline operations but also enhance patient experience by offering personalized and timely care.

“We are excited to partner with Mia-Care to advance healthcare accessibility through innovative digital solutions” comments **Senne Van Kerkhove, Head of Growth at IntelliProve**. “Together, we are dedicated to enhancing healthcare outcomes and making essential services more accessible for everyone”.

IntelliProve developed an AI-assisted facial scanning technology that can accurately determine health parameters within a few seconds. This is done using a conventional camera on a smartphone, tablet, or laptop to perform an optical measurement of the face.

This innovative technology is used in digital health solutions (online platforms, apps or websites) to improve existing health assessment processes. The intuitive and easy-to-use face scan attracts new users, enriches user experience, and increases engagement. IntelliProve measures physiological and mental health parameters with one click of a button within any healthcare or well-being solution.

“Our partnership with IntelliProve represents a significant step forward in our mission to transform digital healthcare” adds **Marzio Ghezzi, CEO at Mia-Care**, innovative startup based on Mia-Platform technology supporting Healthcare and Life Sciences companies in their digital transformation journey. “By integrating their cutting-edge facial scanning technology with our platform, we can provide our clients with advanced, real-time health insights, ultimately improving patient care and engagement.”

ABOUT INTELLIPROVE

IntelliProve is a Belgium-based health tech startup. Their mission is to enable well-being solutions to harness objective insights and enhance holistic health. To achieve this, they've created the most powerful health assessment experience ever made.
