

Mia-Platform and Trakti together to accelerate digital transformation of contract-driven business processes

Milan, 26th February 2026 – Mia-Platform, a leading Independent Software Vendor (ISV) specialising in AI-Native Developer Platform solutions that help large enterprises build scalable and modern applications, welcomes Trakti into its Partner Network. The goal of this collaboration is to accelerate the digital transformation of business processes by placing operational efficiency, governance, and regulatory compliance at the centre of the entire contract lifecycle.

The partnership comes at a pivotal time for companies, which are facing increasing regulatory complexity, ever-stricter compliance requirements, and a growing need for digitalisation and process automation within a context of continuous technological and regulatory evolution.

The collaboration brings together two highly complementary platforms: Mia-Platform's cloud-native platform, designed to support modern, modular, and data-driven architectures, and Trakti's legal tech solution, a unified platform for the end-to-end management of smart and self-executing contracts. By combining these capabilities, the two companies enable organisations to streamline negotiations, reduce operational complexity, and enhance governance, transparency, and regulatory compliance through a single, integrated digital workflow.

Through this collaboration, Trakti's clients benefit from a scalable, secure, and cloud-native technological foundation that supports enterprise-grade integration and evolution, while Mia-Platform provides the tools needed to build, manage, and scale modern applications efficiently. At the same time, Trakti brings advanced expertise in smart legal contracts, blockchain-based execution, and contract lifecycle management, enabling automation and control across complex contractual processes.

The partnership targets enterprise and mid-market organisations operating in highly contract- and regulation-intensive sectors (such as financial services and insurance, energy and utilities, telecommunications, industry, and professional services) which require greater control, traceability, and scalability in contract management. By combining Mia-Platform's agile, modern technology with Trakti's legal tech capabilities, the collaboration is set to deliver tangible value to companies seeking more efficient, compliant, and future-ready operational models.

"For us, the partnership with Mia-Platform represents a natural step in the innovation journey we're pursuing in the legal tech world. We strongly believe that the combination of advanced digital platforms and solutions based on smart legal contracts and blockchain can have a tangible impact on the way companies design, manage, and automate processes. Together, we want to offer companies more agile, compliant, and scalable tools" said Luigi Telesca, CEO & Co-Founder at Trakti.

"We are thrilled to announce our partnership with Trakti, a key step that allows us to further enrich our portfolio of solutions dedicated to the Financial Services sector. By integrating Trakti's distinctive capabilities in financial services and payments, we offer our current and future clients an even more comprehensive platform. Together, we are accelerating the digitization of complex processes, ensuring agility and innovation at enterprise scale for industry players," commented Bruno Natoli, CEO at Mia-FinTech.

Mia-Platform and Trakti look forward to cooperating in order to support companies in redesigning and automating contract-driven processes, helping them navigate regulatory complexity while unlocking new levels of efficiency, transparency, and scalability.

ABOUT TRAKTI

Trakti is the **end-to-end unified platform** for compliant, intelligent, and self-executing contracts, integrated with blockchain technology and designed to support the entire lifecycle of contractual

negotiations. It offers multi-model negotiation workflows (including auctions, tenders, onboarding) as well as end-to-end processes for contract signing and automation, including payments.

Trakti streamlines negotiation, execution, and contract governance processes for mid-to-large enterprises, in full compliance with market regulations. The platform introduces a paradigm shift compared to traditional solutions, making negotiations more agile and collaborative thanks to an integrated operational stream combined with control functions, enabling faster processes and increased transparency and compliance.

At the same time, Trakti's cloud-based architecture and technological innovation allow for full integration with blockchain and enable the activation of compliant smart contracts. This unique capability positions Trakti as a leader in the smart contracts space.
